

Boys Bathroom Remodel

First United Methodist Church Stillwater, MN

Our Church is very proud to say that we have hosted either a Nursery School or a Pre-School program since the early 1960's. In 2012, the Pre-School was notified they were in jeopardy of losing their certification/license because of the condition of the boy's bathroom. This bathroom was part of the original church building, built in 1956. Some minor improvements were made to the bathroom in the mid 1990's. In order to meet the current Pre-School regulations, the bathroom would have to be completely remodeled and new fixtures installed.

The Church and Pre-School were not prepared to finance this project on such a short notice. A loan request was sent to Minnesota Builders East (MBE) to cover the cost the bathroom remodel. MBE reacted very fast and we received notice that our loan was approved within a couple of weeks. This was a big relief to the Church since we had just started the Fund Drive to cover the cost of the bathroom remodel and we were worried that we would not be able to raise enough money and complete the bathroom remodel before the Pre-School would lose their certification. Thanks to MBE quick response, the bathroom remodel was completed several weeks ahead of the recertification deadline and the Pre-School was able to open their doors on time for the fall semester.

This was not the first time that we have requested money from the Minnesota Builders East (formerly Metro East Builder). Each time we have request funds from them; they have been very diligent in processing our request and have been very easy to work with.

Thank you MBE for being there when we needed some financial help,
First United Methodist Church of Stillwater
